Narrative:

UCF Police Department**Incident Report**Case Number: **2010-2515**

ORI: FL0481400

Related Other Agency Case Number:

Alafaya Trail. I observed a white 1989 Toyota four door, bearing FL Tag: RFD-244, stopped at the light in front of me with the driver's side tail light out and the tag light out. I proceeded to conduct a traffic stop on this vehicle for those infractions. The final stopping location was southbound on Alafaya Trail, adjacent to the University Commons Shopping Center.

I approached the passenger side of the vehicle. The driver only rolled the window down about an inch and I requested her to roll it down more. After two requests, the driver rolled the window down to approximately three inches. I identified myself and informed her of the reason for the traffic stop. I now identified the driver as Jennifer Vest. Mrs. Vest provided me with the information I requested. During the collection of the documents, I observed a pill bottle inside of her glove box. Mrs. Vest said the vehicle was hers. I requested to see the pill bottle so I could confirm it was her prescription. Mrs. Vest said she was not consenting to a search. I explained I was not asking to search her vehicle but only for the pill bottle. Mrs. Vest complied but was agitated. I confirmed the name on the bottle matched Mrs. Vest's and returned the bottle to her. Mrs. Vest continued to be confrontational while speaking with me so I asked her why she was so upset. Mrs. Vest expressed she felt she was being harassed and did not know why she was being stopped. I explained to her again the violations I observed. Mrs. Vest said she just had her vehicle in at the shop and could not believe they did not tell her about the issues. I informed Mrs. Vest the vehicle was her responsibility and she could examine it for the violations when she gets home if she like.

I returned to my vehicle and requested Ofc. Freeman responded to my location. I proceeded to complete a Uniform Traffic Citation for the Tag Light Being Out (0087-GIM). I also indicated on the citation I was giving Mrs. Vest a warning for the tail light. Ofc. Holt and Ofc. Freeman arrived on scene as back-up officers at 2105hrs. and 2108hrs. respectively. I explained to Ofc. Freeman I wished for him to conduct a K-9 sweep of the vehicle.

I approached the vehicle and requested Mrs. Vest to exit her vehicle. Mrs. Vest first refused and said she did not feel safe. After explaining to Mrs. Vest she had to exit the vehicle to prevent resisting, she complied. Once out of the vehicle I explained the citation and warning to Mrs. Vest. Mrs. Vest signed the citation. While this was occurring Ofc. Freeman was conducting the K-9 sweep. See his report for further information. Mrs. Vest was verbal in that she was not consenting to any search of the vehicle. Ofc. Freeman informed me that K-9 Connor alerted on the vehicle and I proceeded to search the car.

Upon searching, I located the original pill bottle, at which time I confirmed the pill identity of it's contents. I also located a small silver container attached to her key change that contained pills inside of it and a blue seven days of the week container in her back pack with various pills. I also located a green leafy substance inside the vehicle on the back seat. There was also an empty pill bottle located under the front passenger seat with traces of a white powder residue inside of it. I proceeded back to my vehicle to further examine the items.

I also requested Ofc. Abud respond to search Mrs. Vest for me at this time. Ofc. Abud arrived on scene at approximately 2128hrs. Ofc. Holt cleared the scene when she arrived. Ofc. Abud completed the search of Mrs. Vest for me.

At approximately 2134hrs., Mrs. Vest started complaining of chest pains at which time the Fire Department was requested to respond. They arrived on scene at approximately 2140hrs. (Medical Response also completed)

I examined the items in the blue seven days of the week container. Half of the appeared to be supplemental pills and there were two to three other pills that had marking on them. I however was not able to identify any of those pills with marking as some were even broke in half. I tested the green leafy substance which came back negative for cannabis. I also attempted to test the trace amount of the powder for meth and cocaine. Both of these tests came back negative. It is unknown if enough sample was provided for either of these tests.

Mrs. Vest decided not to be transported to the hospital and was released by the Fire Department. I gave Mrs. Vest all of her information back. Mrs. Vest had now calmed down and proceeded back to her vehicle. Mrs. Vest had to wait approximately an additional five minutes before being allowed to drive, per the Fire Department, since she took some heart medicine. I informed Mrs. Vest when she was allowed to leave.

Mrs. Vest and the remaining units cleared the scene at approximately 2213hrs.

Approximately five minutes after clearing the scene I remembered the small silver container that contained pills inside of it and realized I did not examine those pills at all or give them back to Mrs. Vest. I was with Sgt. Furnas when I discovered this. I located the container inside my vehicle and found the following pills inside of it:

1) Two oval off white pills, contain a WW or MM with a vertical score in between them on one side and the numbers 60 or 09 with a vertical score dividing them on the other side. I could not identify this pill. This pill was also in the blue seven day of the week container.

UCF Police Department

Incident Report

Case Number: **2010-2515**

ORI: FL0481400

Related Other Agency Case Number:

- 2) One half of a peach circle pill, with a visible 2 on one side and LU on the other side. This pill was also located in the other blue seven day container. After further investigation I was able to identify the pill as Lisinopril. The rest of the pill should read LUPIN and 20. Lisinopril is not a controlled substance as it is not a scheduled drug however it is available only via prescription only.
- 3) One white circle pill, containing a GG score and the 21. I was able to identify this pill as Furosemide. Furosemide is not a controlled substance as it is not a scheduled drug however is available via prescription only.
- 4) Three halves of a white circle pill. Two being one side of a Furosemide Pill contain 21 and the other one being the other side of a Furosemide Pill containing a GG.

All of the pills have been entered into evidence. I am requesting investigations follow up with the identification of pill item number one and confirm the other pill identities as well. Investigations can also continue the investigation and decide if formal charges should be filed with the State's Attorney's Office for Unlawful Possession of a Prescription Pill would be appropriate. I was not able to further question Mrs. Vest on scene about the pills as she wanted to speak with a lawyer.

Supplement Report

Patricia Trovillion-Evidence Division

On August 17, 2010, I spoke with Deputy Chief Zelanis regarding the above listed case. He requested that I bring the seized drugs (2 identified and 1 unknown) to a pharmacy in an attempt to identify them. It was determined that the drugs would be brought to the pharmacy on campus.

On August 20, 2010, I brought the three submissions to the UCF Health Center Pharmacy. I spoke with Brenda Walker (Pharmacist) and after checking her resources, she was able to determine that the unknown tablets (UCFPD submission #2-2 yellow, oval, scored, imprinted tablets) were Isosorbide Mononitrate (60mg). She advised that this drug is typically used to treat heart/blood pressure issues. I asked her to review the other two submissions (UCFPD submissions 3 & 4) and verify that the identifications made by the officers were accurate. The officers identified submission #3 (1/2 peach pill) as Lisinopril (typically used to treat heart/blood pressure issues) and submission #4 (1 whole and 3 half small white pills) as Furosemide (typically used as a water pill and used to treat heart/blood pressure issues). She verified the identifications to be correct.

On September 1, 2010, all drugs submitted by the officers have been identified as described above. No further analysis will be done on them.

Police Information
Gemini Blvd.
Jennifer Lisa Vest

11 AUG 10 I received this case.

13 AUG 10 I reviewed this case. This case involves unidentifiable prescription medicine that were seized from Dr. Vest's vehicle in which all appeared to be identified with the exception of two pills that are oval, off white, contains a WW or MM with a vertical score in between them on one side and the numbers 60 or 09 with a vertical score dividing them on the other side.

17 AUG 10 At 1120 hrs. I met with Ofc. Elliot at UCF PD and informed him the pills were related to someone with heart issues. However, I was unable to identify the two oval pills that were off white, contained the WW or MM with the numbers 60 or 09. Ofc. Elliot requested I still contact Dr. Vest and check to verify if she has prescriptions for the drugs. At 1623 hrs. I requested Patricia Trovillion (evidence custodian) not send the drugs to FDLE for analysis at this time pending Dr. Vest cooperation in providing prescriptions for the drugs located.

At 1640 hrs. I telephoned Dr. Vest and left a voice mail message for her to call me regarding this case and asked for her cooperation in providing her prescriptions for the drugs Ofc. Elliot located. This would assist in positively identifying the unknown off white oval pill.

24 AUG 10 At 1040 hrs. Dr. Vest has not responded to my request. I requested Patricia Trovillion (evidence custodian) send the pills Ofc. Elliot placed into evidence to FDLE for analysis and identification. Patricia Trovillion informed me that in lieu of taking the prescription drugs to FDLE for analysis she had already taken all of the pills to the UCF pharmacist for identification. The pharmacist positively identified all of the pills as being prescribed medicines which relate to heart issues. The half peach pill with 2 on it was identified as Lisinopril. The white circle pill containing GG and 21 was identified as Furosemide. The two unknown pills with WW or MM with the numbers 60 or 09 was identified as Isosorbide Mononitrate 60 mg.

01 SEP 10 Considering the above information and based on my knowledge, training, and experience these are prescription drugs which are not known to be abused.

I recommend this case be closed and reclassified as a police information report.

Comments

I responded to the above location in reference to a narcotic sweep of a vehicle. Upon arrival, Ofc. Elliot requested that I conduct a free air sweep of that vehicle. I started my free air sweep on the driver side rear bumper and worked counter clockwise around the vehicle. K-9 Conner worked around the passenger side door and started to work a scent cone around the passenger side door. K-9 Conner actively sniffed and was bracketing a scent cone. He then gave his final indication of a sit. I praised him up and he continued around the car. K-9 Conner on the driver side door sniffed deeply at the door seam of the driver side door and sat again. I praised him up and placed him inside my marked K-9 vehicle.

The Driver Miss Vest was very uncooperative and while I explained on what was going on she accused me and the other officers of violation of her rights and wouldn't let me explain anything to her. I stood by while Ofc. Elliot searched the vehicle and took no further police action. A search of the vehicle resulted in negative results.
